

Thesis Student Scholarship

Would you like to work on your thesis at the world's leading technology provider of processor IP and get paid for it? Apply now!

What do we offer?

- Opportunity to work on thesis topics related to Arm's world class technology – please see topics below
- Experience of working with an engineer from Arm's Budapest office as your company supervisor
- Sponsored thesis work for 5 months through our scholarship in the value of 400 000 HUF
- Possibility to build your career at Arm by staying as an intern once the program is ended

What do we expect?

- Work closely with your dedicated internal supervisor on your thesis topic
- Write and present your thesis for a team of our engineers
- Be your brilliant self

Thesis topics by Arm

Design and verification of a performance accelerator for Cortex-M SoCs for:

- Color space conversion
- Alpha blending
- CRC32 calculation
- Or bring your own idea!

The Application Process

Pick a thesis topic that best meets your skills and interest. Please send your motivation letter to gergely.kiss2@arm.com by February 18th latest and then wait to hear back from us.

If your initial application is successful, we will invite you to a video interview so we can chat about your ideas, interests and motivations.

Finally, if we think you have what it takes, we'll welcome you to our Thesis Student Scholarship program!
